

Results: North American QSO Party CW — August 2014

It was a record-setting August!

Single-Operator, Low Power

For the second year in a row, all Top 10 Single-Operator, Low Power scores broke the 1000 QSO barrier! Twenty-two participants averaged more than 100 contacts per hour for the 10-hour event. The top four single ops broke the previous August CW record set in 2012 by N5KO. In the end there could be only one winner, and Bud, AA3B, came out on top. His score of 282,741 is a new all-time August NAQP CW record, besting the previous milestone by a sizable margin. In second place was *NCJ* editor, Kirk, K4RO. After the log-checking dust settled, Kirk and Bud were separated by less than one QSO! Bud's 30 additional contacts were just enough to make up the difference in Kirk's six additional multipliers. Randy, KØEU, came away with third place, just missing second by fewer than 10 contacts. Rounding out the "Record Breaking Top 4" was Steve, N9CK. In fifth place was Ralph, K5GA, operating at NR5M. It is great to see such great competition for the top spots! When things get down to the wire, accuracy can sometimes make all the difference.

Single-Op QRP

In the QRP category, Ken, KE3X (@N4RV), proves he knows how to play this game well. Ken's score of 128,641 is a new August CW record, and the second highest QRP score of all time. Ken's January QRP score represents the all-time NAQP CW record. Steve, KØOU, grabbed second with nearly 500 QSOs. Once again the battle for the third spot was *very* close! W6JTI came out ahead of NN7SS, after the log-checking battle was over. W6JTI's seven additional contacts were just enough to get past NN7SS's additional multiplier. Rounding out the top five, N7IR in Arizona was only 12 contacts behind NN7SS. Conventional contest wisdom says that "every QSO counts" and that seems to be very evident in the QRP category.

Multioperator

The gang at W2FU set a new August record with their M2 score of 526,023. They held the previous record set in August 2012. A combination of good band conditions and great participation helped them log nearly 1900 QSOs. The WØDLE team in Colorado came in second, just shy of 1700 QSOs. These are impressive QSO

totals for only 100 W! The M2 category in the NAQP events is a great way to introduce new contesters to the multiop world, without the need for a large multi-tower station. It is also a great way to have a lot of fun with your local radio friends, yet won't eat up an entire weekend!

Team Competition

There were 79 different teams registered this year, an increase of eight teams over the previous August. Increased team participation means more people to work *and* higher scores. We want to express appreciation to those who organize their regional teams each year, ensuring we all have lots of stations to work when the clocks hits 1800 UTC.

There was a noticeable decrease in the number of erroneous M2 submissions this year, thanks to a few changes the log-submission website team made. Always double check your category when submitting your log, as some logging programs automatically will put you into the "assisted" category, which NAQP classifies as M2. Congratulations to the winners, and let's hope the record-breaking years keep coming!
