

Results, August 2002 North American QSO Party—SSB

Bruce Horn, WA7BNM
bhorn@hornucopia.com

Proving that he can win in both the winter and summer North American QSO Parties, N6MJ led all single-op contestants with 240,555 points. K4WX and N6NF rounded out the top three places by also recording more than 1000 QSOs each. K5WA and N6ED operating K6NA and K4AB took the next three places with only 2k points separating fourth through sixth places. K0UK took seventh, while frequent top-tenner, W5AO operated W5TM for eighth place. N0AV followed closely in ninth, while N4BP took tenth without making any QSOs on 160 or 80 meters.

The multi-two category was an all-Texas battle for the first three places. The W5NN crew took first, while W5KFT edged K5TR by less than 800 points for second. While the scores weren't close to the January results, this was one of the most hotly contested multi-two categories in NAQP history.

In the team competition, the Tennessee Contest Group #1 team, with two top-ten single ops, comfortably beat the Southern California Contest Club #1 team, which also had two top-ten single ops. The Northern California Contest Club #1 team squeaked into third place

by less than 300 points. An examination of the team results shows that it is important for all registered team members to submit their logs. First and third place teams had all five team members contributing to the team score, while the second and fourth place teams only had four members each.

As a reminder that success in contests is not always measured by the total points scored, N1NJN reported that he was excited that one his three total QSOs during the contest was with a station in Idaho—the first station he had ever worked outside of the tri-state New York City area.
