

Results: North American QSO Party, CW — January 2025

Let's go back in time, ten years, to the January 2015 NAQP CW contest. By all indications, conditions were excellent. The top Single Operator score was record-breaking, with the operator averaging 165 QSOs an hour and a final point total of 454K. This operator's best hour of the contest totaled 218 QSOs. The second-place finisher was right on his heels, with a score of 448K points. As is often the case in January, the top ten was dominated by stations from the central or western part of the country, with only two from back east.

Now, flash ahead to January 2025. What a difference ten years makes! Again, conditions were very good. The top Single Operator score was again record-breaking. The operator averaged 245 QSOs an hour, with a best 60-minute rate of a whopping 348 QSOs. The second-place operator's QSO average was well above 200 an hour. The winner of the 2025 January NAQP CW? Steve, N2IC. The second-place finisher was Pat, N9RV. Both of their scores were 200K points higher than the third-place finisher.

Coincidentally, Steve had finished second to Pat in the 2015 NAQP CW event ten years prior. N2IC's new Single Operator Unassisted record of 768K points just broke the previous record, set by KL9A — operating from, perhaps you guessed — N9RV. These two calls are often seen at the very top of the NAQP CW score box.

Single-Operator Low Power

As mentioned previously, stations in western parts of North America often end up with a propagation advantage in January, with east-west propagation to populated areas on the high bands, and quiet conditions on the low bands to help mitigate the longer

haul distances to populated parts of the country on 80 and 160 meters. (Summertime sporadic-E on the high bands can help shift the advantage east for the August event.) It's definitely worth noting that the top ten in the Single Operator category (Table 1) differed from ten years prior because 7 of the 10 positions were taken by stations operating from locations east of the Mississippi River.

Following N2IC and N9RV were Tor, N4OGW, and two stations from Ontario, VE3JM and VE3DZ, respectively. Sixth place went to K1TR in New Hampshire, whose additional QSOs helped offset fewer multipliers worked by 7th-place finisher Nate, N4YDU. Wolf, NN7CW, operated behind W1YL in memory of Ellen to finish 8th. Rounding out the top ten were K6LA at VY2TT, followed by Dave, K5GN. This was as close a race as possible, with the difference in score being less than a single QSO! It's worth mentioning that 20-year-old Kees, W0AAE, just barely missed the top ten by one position. He did a fantastic job from NØNI's station in Iowa, after strategizing by studying KL9A's winning log from last January.

Single-Operator QRP

Brian, N2MF, was able to improve from his second-place finish a year prior and took the win in this category (top scores in Table 2). Second place went to perennial Single-Op QRP entrant W6JTI from his solar-powered shack in northern California. Rounding out the top three was Will, NQ2W, operating from New York.

Single-Operator Low Power Assisted

Milen, LZ5DB, operated from the K1LZ superstation in Maine as ND3T, taking the top spot in the assisted

category (Table 3) and just breaking the record set last January by VE5MX. Milen primarily operated 2BSIQ (2 bands, synchronized interleaved QSOs), and was able to pull away from second-place finisher AA3B, who has dominated the assisted category since its inception, primarily by operating classic SO2R. Both operators finished with the same number of multipliers worked. WD6T handed out the rare NV multiplier from W7RN and finished third, while last year's winner, Todd, VE5MX, came in 4th. VE5MX was able to work a whopping 352 multipliers. Only VE3EJ had more, primarily due to a big 160-meter total. KØEU and N5RZ took fifth and sixth place, respectively, from the middle part of the country. Jim, VE7ZO, finished 7th, just ahead of the top multiplier "getter," VE3EJ from the other side of Canada. Finishing out the top ten were Rick, K11G, with the always welcome RI multiplier, and John, W8FJ.

Single-Operator Assisted QRP

John, W2GD, took the top spot in the assisted QRP category (Table 4) for the third January in a row, though he fell just a bit short of breaking the record he set last year. Kyle, WA4PGM, took second place, with WQ6X finishing third.

Multi-Two

There was a very close battle between the top two teams in the multi-two category (Table 5), the four-man team of KI6RRN, N6MJ, N6WIN, and W9KKN at ND7K, and the father-son team of K5GO and N5DX, who operated ZF5T. ND7K had the manpower advantage, with two in-band stations, while ZF5T had the Caribbean advantage and the fantastic salt water QTH takeoff for the low bands. They ran neck-and-neck for the entire 12-hour

event, with the ND7K crew coming in just ahead at the finish. The well-oiled machine that is team W2FU took the third spot. Kudos to 9-year-old Maggie, KE2AIZ, who was part of this team and contributed to the QSO total. She went from not knowing CW a year ago to being able to work stations at 25 WPM+ in the NAQP CW (See top Youth scores in Tables 6 and 7). Fantastic job to Maggie and to the W2FU team for mentoring her.

Team Scores

Eighty-seven teams entered the fray (Table 8). The AOCC Gila Monsters had the top team score. FRC Team Watt took second, edging out the third place Zoomers by less than 2%.

In Closing

Mark your calendar for the next NAQP CW contest — 1800 UTC August 2 to 0559 UTC August 3, 2025.

If you're unaware, Bruce, WA7BNM, updated the NCJ website and you can easily download your certificates by looking for the "Print Your Certificate" link on the NAQP home page. Huge thanks to Bruce for all he does to keep the NAQP page up-to-date. As always, if you're interested in a copy of your log check report, please send me an email and I will reply directly as quickly as possible with a copy of your report.
