

Results: North American QSO Party CW — August 2013

For the first time since 2010, all of the Top 10 August NAQP CW scores broke the 1000 QSO barrier. Topping 1000 contacts is much less common in August than in January. Increased participation, combined with better-than-average band conditions, made for a memorable NAQP.

Trey, N5KO, operating from W6NL, came out on top, leveraging some great high band totals to overcome the inevitably challenging low bands in the West. Mike, W9RE, was hot on his heels and finished in second place with the most multipliers among the single ops. KØEU, N5RZ, K4RO, KØRF, VE3JM, N7MH (@W7RN), and N9CK all made the Top 10 with their personal best August NAQP CW scores. VE3JM and N7MH made the Top 10 box for the first time. *Outstanding!*

A regional race or two typically stands out, and this year the race for top honors in Colorado between KØRF and KØEU was very close. KØEU came out on top with 88 more contacts, making up for KØRF's five additional multipliers.

QRP

The stand-out winner in the QRP category was Steve, KØOU, who definitely found the right formula for working multipliers. Steve had a whopping 37

more multipliers than the second-place QRP scorer. The battle for second and third places was very close. W6JTI pulled away from the pack with enough additional contacts to clinch second. The difference between third and fifth places was only 753 points. N7IR snagged third place with the best combination of contacts and multipliers over N5OE and N4OO, respectively — a great horse race between three stations in completely different parts of the country. Just because you aren't in the generally accepted "sweet spot" to rack up a high score doesn't mean you can't compete!

Multi-Two

The team at NX5M came away with a win in the M2 category. This looks to be NX5M's first M2 entry in the August NAQP CW. Team NX5M's considerable experience in the other versions of the NAQP proved to be helpful, powering them to make both the most contacts and find the most multipliers. The team at NC4KW came in with a great second-place score, while the two-man team at N6DZ placed third.

Teams

A total of 71 teams went at it in this event.

Team competition was very close this time, with NCCC #1 coming out on top. It probably comes as no surprise that the top three teams each had at least one score in the Single-Operator Top 10. The second spot went to the DFWCG Pacemakers, and CCO #1 placed third. Once again the top three scores were from three separate corners of the continent!

Summary

With everyone in the Top 10 making at least 1000 QSOs, too many personal bests to list, and the number of logs going up every year, it's clear that the NAQP is thriving. If you haven't given this contest a try, definitely check it out. A modest station with a tribander and wires can make "The Box" while not giving up an entire weekend. It's a great first contest to try SO2R or to sharpen your skills on a relatively equal footing without amplifiers.

Thanks to everyone who organized the teams within their respective groups. An archive of NAQP CW scores and records is at <http://naqp.contesting.com>. The volunteers creating and maintaining this website have done a fantastic job. It is a great place to plan your next assault on a personal best or state record!
