

RESULTS
SEPTEMBER, 1980, NORTH AMERICAN SPRINT

By
Rusty Epps, W6OAT

The September Sprint clearly was our biggest ever. One hundred seventy-two stations submitted logs, with 146 of them participating as part of the twenty-two team entries. Andy, N2NT, returned to the top of the pile with both the largest score and the most QSOs, and fell only seven contacts short of eclipsing K3LR's all-time record of 13,692 points set in September, '79. The top-ten scores bunched closer together than ever before with only 1,344 points separating first from tenth place. Whereas the top ten QSO producers were within 38 contacts of each other last February, tenth place was down by only 25 this time. Thirty-three stations topped the 250 QSO mark and six of them made it over 300. Twenty-eight cracked the 10,000 point barrier.

Team competition continues to grow in popularity, and it got hotter than ever. W2GD's Independent Contesters reclaimed their top billing by narrowly inching past N6TJ's Tigers and WA6VEF's Paper Club. Both IC #1 and the Tigers exceeded the 100K mark to become the first teams to average in excess of 10,000 points per entry. There also were some tight races a bit further down in the standings with about 1,000 points separating the Piranahs from the DX Weasels and about 100 points between the PROS and The Force.

Without question, we saw a huge increase in multipliers this time. There were a number of states active from which we've never had entries before, and thirty new state and province records were set! Sixteen of these records are scores in excess of 10,000 points, so it's going to be a bit tougher from here on out to knock off your state or province leaders. Tougher that is, unless you happen to live in Maine, Delaware, Kentucky, South Carolina, New Mexico, Oklahoma, Utah, Nebraska, North Dakota, South Dakota, VE1, VE2, VE6, VE7 or VE8 from which we still have had no logs submitted since we adopted our present scoring rules. If you happen to live in one of these areas, February '81 just might be your chance for immortality if your log reaches us before the deadline.

In the way of reminders, please don't forget that proper logging requires you to clearly show the time you make each QSO. This is becoming more important as we tighten up on log checking. Before we toss out a QSO because a station claiming to have worked you is not in your log, we would like to know for sure who you were working at that instant as often we can piece together what happened and explain the discrepancy. It's difficult to do that when your log only has the time entered once every ten or fifteen minutes. Also, please determine your number of QSOs per band and calculate a total claimed score. Finally, don't forget to put your name and address on your log (as did two famous contesters in September!).

The 1981 Sprint rules are printed elsewhere in this issue and are identical to those of 1980 with the exception that in February your logs should be mailed to a new address. For the February Sprint only, please send them to Rusty Epps, W6OAT, 5-A Buena Vista Terrace, San Francisco, CA 94117. I'm in the process of moving, and hopefully I'll have my new, semi-permanent QTH by time the September Sprint rolls around. That address will appear in a future issue of the NCJ.
