

RESULTS

September, 1982, North American Sprint

By Rusty Epps, W6OAT

Awesome! How else can one describe K5ZD's incredible 350 QSOs and all-time record score of 14,350 points? Randy really pulled out the stops this time, establishing a mark the rest of us probably will be shooting at for a long time to come. Analysis of his log reveals K5ZD worked numerous Sprinters on all three bands, particularly stations in the fifth, eighth and tenth call districts where participation was unusually high because of the organizational efforts of the TDXS, Popguns, and Motley Crews. The hot team competition supplied Randy with an abundance of loud, relatively near-by stations all of whom are just one hop from Texas on any band. That was precisely what it took for Randy to walk (run!) off with all the marbles for the second time in a row.

And speaking of team competition, N6TR's Winning Alliance of Sprint People #1 nailed down its second consecutive victory with an impressive 112,955 points. This falls 1,105 short of the 114,060 amassed by the Independent Contesters in February, 1981, but still represents and all-time second and WASP's best effort to date. IC took the show position which itself was no small feat considering they had only eight scores! Motley Crew #1, Texas DX Society #1, Potomac Valley Radio Club #1, and Popguns #1 all deserve honorable mentions. From the looks of it, it won't be long before three or four teams bust the 100K barrier.

Statistically, the September Sprint had some interesting quirks. Of the 154 entrants, twenty-one found 42 or more multipliers. N2NT, K8CC/5 and K7GM each ferreted out 45 to lead the pack and to tie the all-time multiplier record. On average, most stations improved their multiplier total by about two when compared to past Sprints. QSOs, however, were down. Just seven stations cracked the 300 mark, a decline from 12 last February. N6TV is the only new call sign to appear in the top ten. Except for Bob, everyone else is a veteran of that sacred turf.

After I complained in the last NCJ of the lack of activity from certain areas, we received three logs from Oklahoma! K7CW/5, KM5H and W3AS/5 all saw to it that OK no longer is a blank spot in the records column. Similarly, logs from VE1ABU and XE2AQ posted new marks where before there had been but open space. Congratulations, in fact, to all sixteen stations who set new area scoring records: K2LE/1 in VT; K3LR in PA; K1ZX/4 in FL; K4BAI in GA; W5XZ in LA; K7CW/5 in OK; K5ZD in TX; K7NHV in ID; K8MR in OH; N8II in WV; KJ9W in IL; W9RE in IN; W0UA in CO; K0VBU in KS; VE1ABU in Maritimes; and XE2AQ in Mexico. In most of these areas, the number of QSOs made in September was less than that posted by the previous record holder; the extra oomph came from an increase in multipliers which was sufficient to edge these scores above the old highs.

Bowing to popular demand, we've made a change in the way we're reporting September's results. If you were assessed a penalty in this Sprint, we have deducted the points from the total QSOs made on the band where the infraction occurred. Thus the numbers which appear in the score listing represent valid QSOs less penalty QSOs. You now can multiply QSOs times the multiplier and actually arrive at the final score. In past Sprints, we reported the number of valid QSOs on each band and factored the penalty only into the final score. In those Sprints, QSOs times multipliers might not equal the final score. It all depended on whether or not you had been penalized. In fact, you could determine penalty points because QSOs times mults did not match the published score. In sum, the good news now is that the math works; the bad news is that you can't tell how much you got penalized. But then, who among us ever gets penalized...!
