Results—September 1987, North American Sprint CW

By Rusty Epps, W6OAT

eptember had to be one of our best Sprints ever. Activity was way up, 20 meters stayed open, multipliers abounded, and records fell like the rain. Thanks largely to the rivalry between the Northern and the Southern California Contest Clubs. West Coast QSOs were like fodder for logs all across the continent. Almost no one made more than a couple of contacts without working another W6 or W7. The stakes were high—for two cases of beer at the 1988 Visalia DX Convention, the SCCC challenged NCCC to put its top ten scores up against their top ten, and for two more cases of beer NCCC's second ten against SCCC's second ten, and for vet another two cases, their third ten against SCCC's third ten. Each club preregistered four teams, and their members were everywhere. Unfortunately for those of us here in the north, we're going to be hauling six cases of beer to the convention, but at least we can take solace in knowing that our wager contributed significantly to Sprint activity.

There were good scores from all call districts. In fact, 37 stations exceeded the 10,000-point mark, making this Sprint second only to February '82 when 37 stations crossed that barrier. Compared to prior Sprints, most people snared a couple of extra multipliers to help boost the point totals. Congrats to Jeff, KRØY, the op at K5RX, who once again took top honors with 316 QSOs and 43 mults. The 46 multipliers which K5GN found easily outdistanced the competition, but with only 291 contacts. Dave had to settle for the second spot overall. Tree, N6TR, had the highest QSO total with 328, but his 40 mults trailed the rest of the pack and he had to settle for third.

WN4KKN's Blues Brothers team managed to squeak out a narrow victory over SCCC #1, albeit with the benefit of only nine entries as compared to SCCC's ten. Unfortunately, the loss of one of the Brothers to a disqualification cost the team a 13k score, and thus they just fell short of the all time team record of 115,601 set by the Independent Contesters team in

September 1981. TDXS #1 had a solid lock on third place and, similarly, NCCC #1 had no real competition for fourth. In case you wondered why everyone in the Pacific Northwest is named "Ed," you can thank K7SS for his team entry, The EDs!

And the records did fall! There were 11 new ones and one near miss! The oldest to tumble was from Japan where JH4UYB erased JH3XCU's mark set way back in February '79. From out west, WA7NIN beat his own Nevada high set in 1980, and WE7B topped the prior Utah record from 1981. K1ZX/4 in Florida, K4PQL in North Carolina. W5WMU in Louisiana and W9RE in Indiana all erased prior records dating back to 1982. KM5H's new Oklahoma mark raised the 1984 record by 4.474 points and was the single largest increase in the contest. The 1985 Mexican record fell to XE1FUX/2's assault, and in Canada, VE7AHA nudged up his own British Columbia record by 68 points. WA3PWL/Ø submitted the first log ever received from North Dakota, so Bill lays claim to the initial record from that state. In

the close but no cigar category, Frank, W3LPL, missed the Maryland record by one lousy QSO.

Several logs contained comments about the practice of making prearranged schedules with rare multipliers. Everyone conceded that under the existing rules there is nothing wrong with doing it. But in general, they advocated the position that such a practice ought to be discouraged unless the

multiplier can be talked into participating in the Sprint so others also get a shot. A scan of some of the logs shows first QSOs being made with such goodies as VE8, TI2 and 8P6. These multipliers do not appear in any other logs so they really don't contribute to the overall health of the contest. If one assumes a score of, say, 300 QSOs and 40 multipliers, it takes about 8 contacts to equal the value of one more multiplier.

That's pretty significant when scores are as close as they are in a Sprint. The question is whether or not enough people are concerned about this practice to make it worthwhile to apply peer pressure to curtail it. Could a rule be enforced? Or, excepting those of you who made the log comments, does anyone else even care? I solicit your opinions either in letters to the NCJ, or as notes in future Sprint logs.
